Dear employer or client:

Some years ago I finished my first degree at the National University of Mar del Plata as an Accountant, I have more than 4 years of experience in accounting control and management. I am currently specializing in IT professions, I have completed my Master in Digital Marketing and Web Analytics and a Full Stack Python course, but that's not all, I continue to study to this day as a Community Manager and data analyst, and many others courses that I take when I have free time.

I am a very dynamic, proactive and very dedicated person, I enjoy learning new things and growing professionally in various fields

I have strong communication skills, my mother tongue is Spanish but I have very good knowledge of English.

I can work under pressure and in a fast growing environment. I like challenges and participate in new projects.

If you are looking for a profile like mine, do not hesitate to contact me, it is always a good time for a new possibility

Best Regards,

Candela Lopez
